## Every child deserves a BERG

The story of BERG begins in a small village in the middle of the Netherlands. After much sawing, welding and painting in a farm shed, the first go-kart was produced. In the meantime, this hobby has grown to become an international company by the name of BERG. For over 30 years, our BERG Products have found their way to more than 65 countries around the world.

I had a lot of fun making my first go-kart all those years ago. Today I still enjoy developing and selling our beautiful products together with our BERG Employees. Our BERG Products also include a good service, which is why we work together with our enthusiastic dealers and importers. They can tell you all about the BERG Products and there you can try out a go-kart or a trampoline.

Our go-karts and trampolines come in various colours and sizes. In other words, there is always a BERG to suit you. Have lots of fun with your own BERG!

Henk van den BERG  
Director

## That's why you should choose BERG!

### INSPIRING ACTIVE PLAY

#### Playing outside safely

BERG Products are robust and of guaranteed quality. Our products are tested for safety rigorously so that children can play outside safely.

#### Sustainable products

BERG makes durable, timeless products that need very little maintenance. A BERG Product lasts for generations!

#### An eye for design

BERG Products are functional, nicely designed, and perfectly finished down to the smallest detail. Once a BERG, always a BERG.

#### BERG's ingredients

Craftsmanship, design and innovation are the ingredients with which BERG distinguishes itself in the market. BERG's Research & Development department focuses continuously on improving and developing go-karts and trampolines.

# BERG Frame explanation LRO

The large BERG Go-karts (5+/6+), are available with four different frames. You can choose for a standard system, a frame with three gears, an extra long frame or an electrically assisted frame.

## BFR Frame

All large BERG Go-karts have a BFR system. BFR stands for: Brake, Freewheel and Reverse. The BFR system allows you to brake using the pedals, but also reverse immediately after coming to a standstill. In addition, the freewheel ensures that the pedals remain stationary while the wheels are turning. This combination of techniques ensures safety at all times when driving on your go-kart.

## BFR-3 Frame

In addition to the BFR system, BERG also offers a frame with a BFR-3 system. The abbreviation for BFR is still the same, but now with a nice addition: three gears! Three gears on your go-kart ensure optimal comfort and that you arrive at your destination even faster.

Grip with three gears

## E-BFR Frame

The E-BFR Frame is a frame for children age 6 and up. The E-BFR frame is electrically assisted: the harder you pedal, the more assistance you will get from the motor. The extra large frame and the two extra seat positions make the go-kart suitable for both children and adults.

Characteristics of the E-BFR Frame:

- Includes display with speedometer, distance meter, and battery capacity
- With 24V/240Wh removable battery
- 250W middle motor with torque sensor
- Provides at least 6-8 hours driving pleasure (under ideal circumstances)
- Includes battery charger
- An XXL Frame with two extra seat positions

250W middle engine with torque sensor

Display includes speedometer, distance meter, and battery capacity

24V/240Wh removable battery

## XXL-BFR Frame

Thanks to the BERG XXL-BFR Frame, go-karting for taller people is even more fun! The XXL-BFR frame has the standard BFR system, but with a reinforced and extended frame. The main difference is that the XXL Frame has two extra positions at the back of the frame, so there are eight different positions instead of six. This ensures that taller people can sit better and more comfortably in the go-kart.

The seat is adjustable in eight different positions
